

Presents: A Complimentary CPE Seminar-

Cybersecurity &

Cloud Computing

Tuesday, October 21st, 2014

8:00am-8:30am Registration & Networking with Continental Breakfast

8:30am-10:30am CPE

Moses & Singer, LLP
405 Lexington Avenue
New York, NY

Are you prepared to face criminals and hackers? Learn about the steps you can take to enhance security, and how to manage insurance for coverage certainty.

Topics & Speakers:

REGISTER: www.BTWSeminar.eventbrite.com

Frank Licata- President, Licata Risk Advisors

Why IT security is the responsibility of the CFO, not the IT department. What assets are exposed - cash, data, intellectual property, computer systems - and the loss of revenue resulting from their loss. How can we be held legally liable for a breach, and can the right contract language help? Negotiating terms of cyber risk insurance.

Heather Bearfield – Principal, Marcum, LLP

This complimentary seminar will address the process of responding to a data breach, from discovery, to investigation, to remediation, and discuss the technical and practical considerations that face a business in the midst of a fast-paced data breach response.

Amyt M. Eckstein- Of Counsel, Moses & Singer, LLP

Discussion of strategies for negotiating contracts with tech providers. In typical contracts between cloud providers and businesses, liability on the tech side is limited. Can companies break through their limits? Has recent case law shed light on future business practices?

Sean O'Rourke- Principal, Syzygy 3

Building User Buy-in of Security Policies: Employees and users remain the single-biggest security threat to any company. We'll explore ways to encourage ownership among this group for keeping the company's data and systems safe from external (and internal) threats.
