

Risk Report

Florida Property Insurance a problem

What to do about it:

The commercial property insurance market is marked by extreme cost and limited availability/competition.

You've heard the reasons. Now, what are the solutions?

DO NOT keep getting more quotes from insurance brokers. They will emphasize how bad the market is (lowering the bar) and then try to cut your cost by cutting your coverage, by using inferior insurers or by using undisclosed shared limits.

DO hire an expert to be on your side. We do not sell insurance. We are risk managers and insurance advisors who work solely for our clients and only for their benefit. We receive no compensation other than the fee that you and we agree to.

We are experts in dealing with the insurance world. We will obtain for you the best results today and position your organization for being prepared to go forward.
